SUMMARY

Enthusiastic and results-driven Python Developer with a strong foundation in both web development and data science principles. Experienced in building and optimizing automation scripts and applications using Python, Django, and REST APIs. Proficient in key data science libraries such as Pandas, NumPy and Matplotlib. A proactive problem-solver with a keen eye for efficiency and a solid understanding of data structures and algorithms. Eager to contribute to a dynamic Data Science team and translate business requirements into scalable, high-performance solutions.

PROFESSIONAL EXPERIENCE

ONE IT SOLUTIONS PRIVATE LIMITED. **August 2023 – Sep 2024**
Full Stack Web Developer (Python & Web Technologies)

- Collaborated with cross-functional teams to analyze business requirements and translate them into efficient, scalable Python code.
- Developed and maintained dynamic web applications using Django, Django REST Framework, and Python.
- Managed and maintained relational and non-relational databases (MySQL, SQLite, MongoDB), ensuring data integrity and optimized performance.
- Participated in the full Software Development Life Cycle (SDLC) from design and development to testing and deployment.
- Implemented authentication systems (JWT, OAuth) and enhanced application security.

PROJECTS

Data Security Application-

- Developed a Python-based application using OpenCV and the face_recognition library to build a facial recognition attendance system.
- Utilized NumPy for numerical operations and data manipulation on image arrays, and Pandas for managing and analyzing attendance logs.
- Implemented algorithms to detect faces, encode facial features, and compare them against a database of known individuals.

Wedding Planner

- Developed a Django-based web application for event planning, enabling users to browse and book vendors such as caterers and photographers.
- Utilized **MySQL** for efficient data management of vendor profiles and booking information.
- Engineered a user-friendly booking system with secure profile management for vendors.

Build Foridge - Real Estate Application

- Developed a real estate web application using Python and Django, inspired by 99acres, to enable property listings and advanced search functionality.
- Built a feature for civil engineers to create professional portfolios and send quotations to clients directly.
- Implemented communication modules to facilitate direct interaction between clients, engineers, and builders, enhancing transparency in home design projects.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Java, SQL,Node.js.
- **Data Science Libraries:** Pandas, NumPy, Matplotlib, OpenCV, face_recognition
- **Web Development:** Django, Django REST Framework, Flask, Bootstrap, HTML5, CSS3, React, FastAPI
- **Database & ORM:** MySQL, MongoDB, SQLite, ORM
- **Tools & Version Control:** Git, GitHub, VS Code, Sublime Text
- **Concepts:** Data Structures, Algorithms, Software Development Life Cycle (SDLC)
- **AI Tools and Frameworks:** LLM's, langchain, Ollama, LangChain, OpenAI API

EDUCATION

MASTER OF COMPUTER APPLICATION (M.C.A)		
Savitribai Phule Pune University Pune.	SGPA: 8.58	August 2024 – July 2026
BACHELOR OF COMPUTER APPLICATION (B.C.A)		
Shivaji University	83.69%	June 2021 – April 2024
H.S.C		
Maharashtra State Board of Secondary and Higher Secondary Education, Pune	86.50 %	June 2019 – Feb 2021
S.S.C		
Maharashtra State Board of Secondary and Higher Secondary Education, Pune.	89.00%	Mar 2019

AWARDS

1st Prize: Hackathon (College Level) Recognized for excellence in problem-solving and application development using Python, Java, and JavaScript.
